Education

Tecmilenio University Cuautitlán Izcalli, Mexico
B.Eng. in Administrative Computer Systems Engineering *2023 – 2027*

- Seventh semester. Relevant coursework: Software Engineering, Big Data and Mobile App Development.

Experience

SCD State of Mexico
IT & Development Assistant *Jun 2026 – Present*

- Development of a custom ERP in a two-developer team, covering the full cycle: requirements, design and build. 9 functional modules to date, projected for ~160 internal users plus ~100 external contractors using the app for attendance and reporting.
- Requirements gathering with every area of the company, one area per module, to define modules, submodules, workflows and system scope.
- Design of the relational database and of the functional architecture of the ERP.
- Collaboration on module development (C# / Razor), supported by AI tools.
- Technical support for company staff workstations.

Depodent Dental Supply State of Mexico
IT Intern *Dec 2025 – Jun 2026*

- Automation of HR psychometric tests (Terman-Merrill and Cleaver), moving them from manual scoring to Python and a web app, cutting scoring time per test from ~20 to ~4 minutes.
- Digitization of ~20 key operational documents (shortage lists, incident logs, financial reports and inter-area communication forms) and linking to Google Workspace, reducing process times by over 60%.
- Maintenance of the digitized documents in Google Workspace (Docs and Sheets) and technical support for staff workstations.
- Analysis of over 100,000 sales records from the previous year, deduplicated, to define minimum and maximum inventory levels across the entire catalog; levels delivered and loaded into the company ERP.
- Investigation and formal report of a security incident (banking malware) on a compromised workstation.
- Training of all staff in ~1-hour sessions delivered to two groups of ~21 people, covering PC components and basic use, and basic and advanced Excel.
- Continued as an external consultant after the internship, handling specific requests from the company.

Maquinados Herrera State of Mexico
General Support *Nov 2024 – Aug 2025*

- Support for workshop operations: tool and machinery handling and identification of improvement areas.

Independent Photography
Photographer *2023 – Present*

- Portrait, event and product photography for private clients, managing the relationship end to end.

Projects and Experience

BissMan Personal project
Product design, requirements and coordination *2026 – Present*

- Product design and definition of BissMan, a white-label management app for small and medium businesses (sales, inventory, debts, consignment and reports).
- Requirements gathering with the businesses and design of the user flows, coordinating development supported by AI tools.
- In active development, with two pilot businesses already running tailored versions (own branding, catalog and database).
- Built with Flutter and Firebase.

Innovation Meetup 2026 — Tecmilenio University Cancún, Mexico
Project Lead — A.L.I.C.E *2026*

- Overall direction and product vision of A.L.I.C.E, an AI commercial-intelligence platform for HPE.
- Product conceptualization, team coordination, task distribution and collaboration on interface design.
- National finalist: top 5 of 20 teams in the challenge, across all Tecmilenio campuses nationwide (second consecutive year in Cancún).

Innovation Meetup 2025 — Tecmilenio University Cancún, Mexico
Project development and documentation *2025*

- Web prototype for employee sales, technical / BPM documentation and a pitch in English. National finalist: top 5 of 20 teams in the challenge.

Awards and volunteering: Proyéctate+ — Academic Excellence (2023); CreceCamp, Tec de Monterrey (2024, 2025); Premios Juventud, Cuautitlán Izcalli City Government (2023).

Skills and Interests
